

Our client is a friendly, private small animal clinic in south-west Germany. The veterinary owner is supported by a dynamic team of over 160 employees. Among the more than 50 veterinarians, there are several diplomates in internal medicine, cardiology, dermatology and neurology. There are also highly qualified experts in small animal surgery, radiology, oncology, ophthalmology, ENT and small & domestic animals. The atmosphere among colleagues, from trainees to diplomates, is informal, international and uncomplicated. Consultations, operations and station are managed with a high level of professional commitment and a pleasant, human touch.

Continuing education is a top priority here: the own residency programme for ECVIM diplomates, several continuing education opportunities to become a specialist, and the acquisition of various additional qualifications form a solid basis for employee satisfaction and veterinary medicine at a well above-average level. A generous continuing education budget and education days are a matter of course for external qualification programmes. Extensive and state-of-the-art technology (including 16-slice CT, 1.5 Tesla MRI, electrodiagnostics) as well as partially new premises and genuine clinic status clearly set the clinic apart from others. A solid base of referring veterinarians appreciates the reliable round-the-clock cooperation, the quality of veterinary care and the professional treatment of animals and humans.

In order to ensure the best possible care for neurological patients, they are treated in a separate, specialist neurological department. This department works closely with the other specialist departments at the clinic. To further expand the neurology department, we are looking to fill a additionally created position for a veterinarian as a

Neurologist for small animals (m/f/d)

The role:

- As a specialist in small animal neurology, you will be an important member of the clinic's team of veterinary experts and part of the neurology department, which will have two specialists in future.
- You will conduct neurological consultations independently and on your own responsibility and will be the first point of contact for pet owners, colleagues and referring veterinarians for all neurological issues.
- You will work particularly closely with internists and surgeons. You will perform operations yourself or interact routinely with the relevant colleagues.
- The wide-ranging use of state-of-the-art internal and external diagnostics, including the latest imaging techniques, enables professional diagnosis and targeted treatment.
- You will make full use of the medical possibilities and establish new standards in consultation with your colleagues.
- By designing and implementing further training courses for all clinic staff, you will enrich their everyday lives both professionally and personally.
- With your confident and competent manner, you will become an important representative of the clinic.
- Your supervisor is the clinic manager.

Requirements:

- To enjoy working with colleagues and pet owners.
- Veterinary degree and several years of practical experience in the clinical field at a veterinary faculty or private veterinary clinic.
- Ideally, completed training as a specialist veterinarian, completed residency or diplomate status.
- A personal focus on medical internal neurology is welcome but not a prerequisite.
- Independent work and a solid knowledge of imaging techniques are required.
- Motivation and passion to constantly deepen your specialist neurological knowledge and keep up to date with the latest scientific developments.
- You are interested in long term employment and continuous professional development.

The offer:

Our client is a medium-sized, private small animal clinic. Here, the well-being of employees and patients is paramount. Thanks to the well-established specialist department, you can expect a high number of neurological patients from day one. You can immediately be 100% active in your field of expertise – side by side with several specialist vets and diplomates from other disciplines.

You will also have the opportunity to share your acquired knowledge with a team of allrounders and specialists, continuously expand it and pass it on. External training courses are generously supported by the clinic management with days off and financial assistance. The latest technical equipment is readily available for you and your patients. Further necessary investments are at the discretion of the neurology team and will be decided at short notice.

The clinic is located on the outskirts of a well known university town with excellent infrastructure for the whole family. The transport links are ideal. Two low mountain ranges popular with hikers and other sports enthusiasts are on the doorstep. France and Switzerland are just around the corner.

For initial contact, Dr med. vet. Felix von Hardenberg and his team are available on +49 8178 9986410.

Please send your application documents (CV, salary expectations and earliest possible start date) by email to application@hardenberg-consulting.com, quoting reference number 2575813.
